

We are excited and proud to announce this is our 11th year in business!

Since opening our door, Akambo has developed into a thriving and highly successful integrated financial services business, comprising of a team of exceptionally experienced professionals with broad industry expertise.

We take enormous pride in our ability to deliver a pro-active and client centric service. Our Philosophy is to always act in the best interests of our clients while demonstrating our core beliefs of transparency, flexibility, and control. We have an absolute responsibility to offer our clients the best help and advice that we possibly can, therefore all advice given is tailored to achieve our clients investment goals, and our carefully considered structure ensures that we intelligently balance risk and reward.

During recent years we have implemented a deliberate and measured approach to better position our business and further grow the wealth of our clients. The structure we have adopted has resulted in a period of steady and welcome expansion. This rapid growth has been driven by the specific support that we offer Accountants and Financial Advisers through two distinct channels, known as "Akambo Private Wealth" and "Accountants Private Advice".

In addition to these channels we also provide an extensive compliance overlay to support and protect our Advisers, as well as have an "Advice Hub", which provides expert coaching and support services to guide the adviser and client through the advice process, from initial engagement right through to implementation and ongoing reviews.

To better position our business, we have launched a new look, reflecting our expanded divisions, influence and activities, and explaining our company structure which offers an unmatched service to the industry and our clients.

Our goal is to help advisers with a direct investment solution and market leading "managed accounts capability", so they can provide their clients a flexible, transparent and low-cost structure that embraces the key principles of the "best interests duty".

Embracing wide and continuous market knowledge, we deliver an easy-to-understand and high-value platform delivering strong results in an ethical manner.
